Best practices for successful fittings with Blu hearing instruments

To ensure successful fittings with Blu hearing instruments, we recommend:

- Blu hearing instruments must be fit using Noahlink Wireless to program
- Check phone compatibility prior to fitting a Blu hearing instrument. Unitron TrueFit fitting software provides a tool that allows you to check the compatibility of your client's smartphone under: Instruments > Selection > click on your Blu instrument style and technology level > Check smartphone compatibility.
- Detect and save the hearing instruments in the Unitron TrueFit fitting software before pairing with a phone
- Close the Unitron TrueFit fitting software before pairing to the phone or Remote Plus app

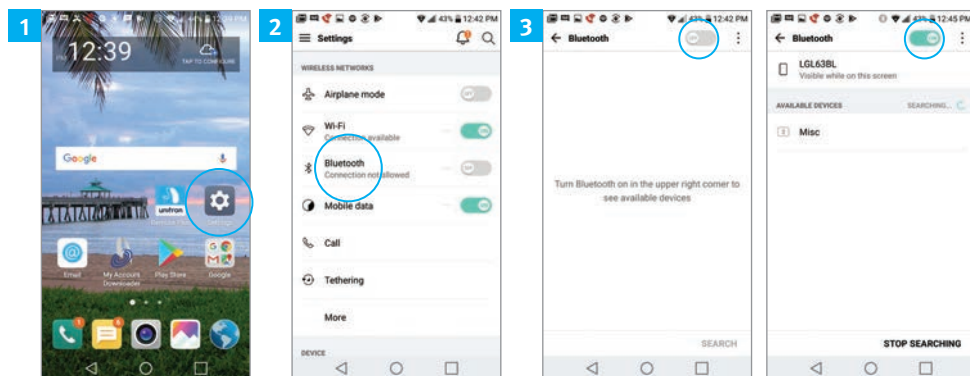

- **For hearing aids that use disposable batteries:** Open and close the hearing instrument battery doors to place the hearing instruments in pairing mode. **For lithium-ion rechargeable hearing instruments:** Press and hold the lower part of the button until a red light flashes (3 seconds), then press and hold again until a green light flashes to start the pairing mode. For all models, the hearing instruments remain in pairing mode for 3 minutes.
 - First, pair **only** the selected phone ear hearing instrument to the phone for hands-free phone calls and listening
 - Second, pair **both** hearing instruments to the Remote Plus app

Smartphones and traditional mobile phones with a compatible Bluetooth Hands-Free Profile

How to connect to an Android smartphone

Open the “Settings” menu from the Android home screen

Click on the Bluetooth® icon

Move the slider to activate the Bluetooth® function

For hearing aids that use disposable batteries: Open and close the battery door to enable Bluetooth® search

For lithium-ion rechargeable hearing instruments: Press and hold the lower part of the button on each instrument for 3 seconds until a red light flashes, then press and hold again until a green light flashes to enable Bluetooth® search

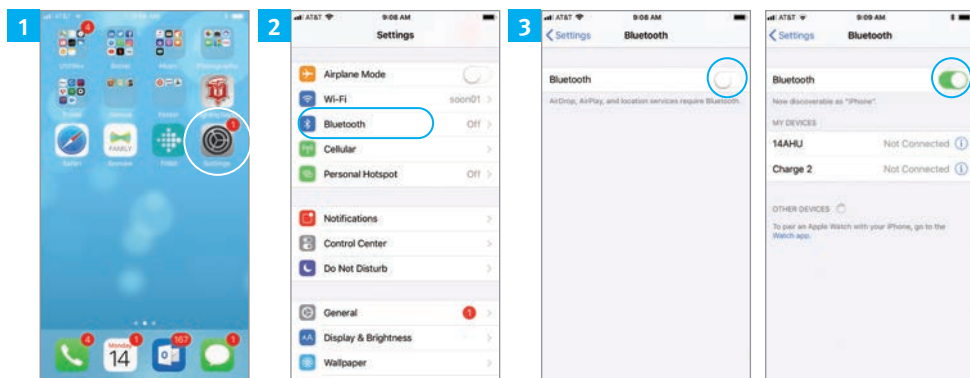

The name of the hearing instrument will appear, click on it to select

The phone is now connected to your client's hearing instruments

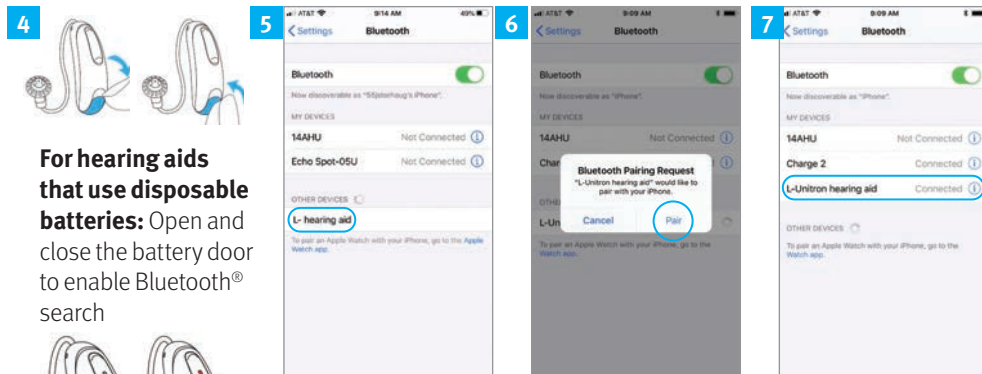

How to connect to an iPhone

Open the “Settings” menu on the iPhone home screen

Click on the Bluetooth® icon

Move the slider to activate the Bluetooth® function

For hearing aids that use disposable batteries: Open and close the battery door to enable Bluetooth® search

For lithium-ion rechargeable hearing instruments: Press and hold the lower part of the button for 3 seconds until a red light flashes, then press and hold again until a green light flashes to enable Bluetooth® search

The name of the hearing instrument will appear, click on it to select

Click “Pair” if the pairing request pops up

The iPhone is now connected to your client’s hearing instruments

How to answer Bluetooth® phone calls

When the phone rings, accept the call with a short push (< 2 seconds) on either the upper or lower part of the button on either hearing aid. A long push (> 2 seconds) on either the upper or lower part of the button on either hearing aid rejects the call/sends the call to voicemail/ends the call.

Answer a phone call

Or

Double tap with
Tap control

(Moxi B-R and Moxi B-RT)

Reject a phone call/send to voicemail/ end a call

Or

End call with Tap control by
double tapping

(Moxi B-R and Moxi B-RT)

Phone calls on a mobile phone

Discover hearing instruments allow **direct** communications with Bluetooth® compatible phones (hands-free classic profile). When paired and connected to a phone, your client will hear the voice of their caller in both ears directly from the hearing instruments. The hearing instruments also pick up your client's voice using its own microphones.

① You do not need to hold your mobile phone close to your mouth, your voice is transmitted through the hearing aids to your mobile phone.

How to adjust the balance between mobile phone calls and the surrounding environment

While on a call on a mobile phone:

- Push the **upper** part of the hearing aid button to **increase** the call volume and **decrease** the volume of sounds in your environment
- Push the **lower** part of the hearing aid button to **decrease** the call volume and **increase** the volume of sounds in your environment

How to connect to the Remote Plus app

Open the Remote Plus app on your client's smartphone and click "Continue"

For hearing aids that use disposable batteries: Open and close the battery doors to enable Bluetooth® search, click "Continue." **For lithium-ion rechargeable hearing instruments:** Press and hold the lower part of the button on each instrument for 3 seconds until a red light flashes, then press and hold again until a green light flashes.

The application will search for your client's hearing instruments. Click Select when device(s) name(s) appear (two instruments for binaural, one for monaural).

Click "Pair" to connect

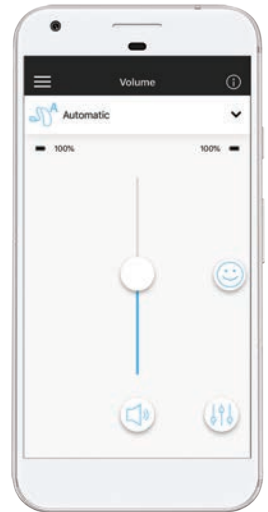

The Remote Plus app is now connected to your client's hearing instrument(s)

Daily use with the Remote Plus app

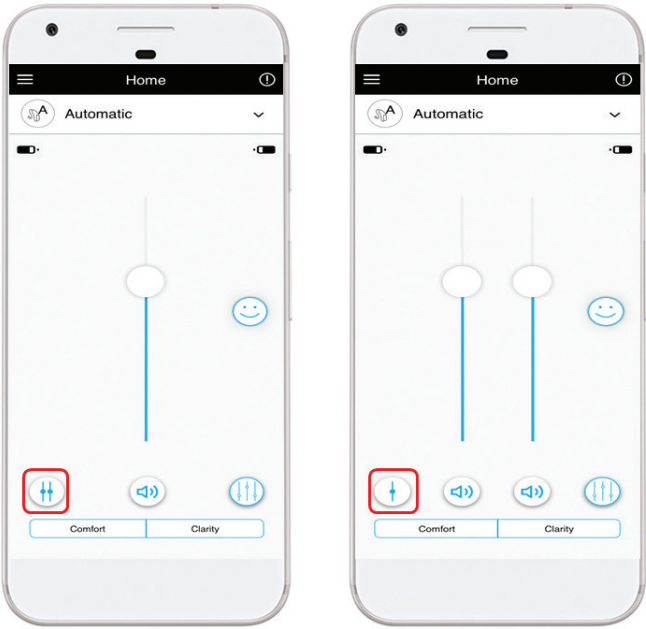

The Remote Plus app provides a way for your clients to personalize their hearing instruments as well as provide you with information about their preferences.

- Change programs
- Control volume
- Watch how-to videos
- Adjust the balance between the media audio and the environment
- Adjust tinnitus masker
- Provide additional comfort/clarity
- Fine-tune their hearing instruments using the 3-band equalizer
- Add Optional Manual Program
 - Reduce Noise
 - Enhance Speech
 - Focus Mic
- Remote adjust
- Coach - receive tips and tricks for care and maintenance
- Submit ratings on their hearing experience

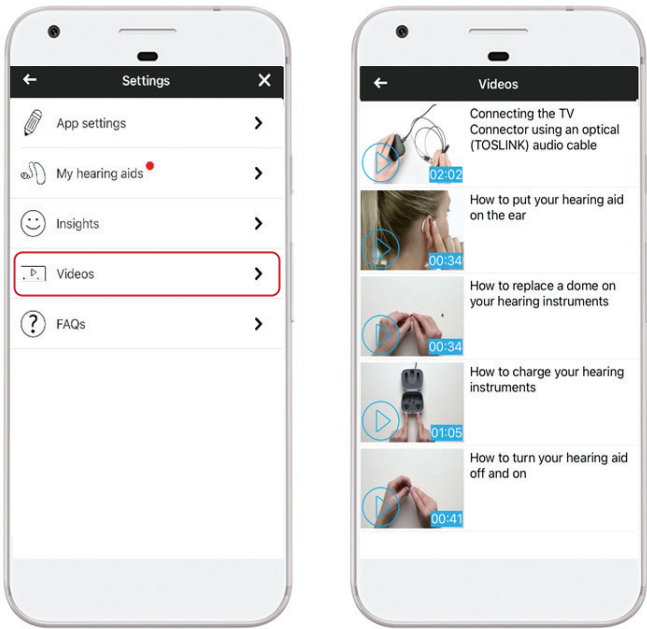

Volume adjustments

Your patients can personalize volume adjustments for each ear independently.

Tutorial videos

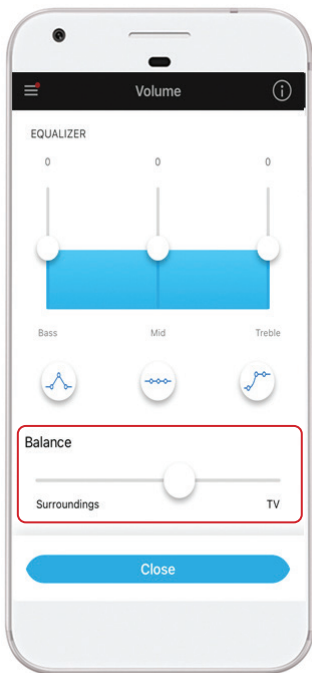

Your patients can watch tutorial videos specific to their hearing instruments about care, maintenance, insertion, removal, etc.

Environmental Balance

Your patients can adjust the balance between the television or streamed signal and the environment using the Remote Plus app.

Slide to the left to have more surrounding environment volume and less television or streamed signal volume. Slide to the right to increase the volume of the television or streamed signal volume and less surrounding environment volume.

Comfort/Clarity

While in the automatic program your patient can select either the Comfort or Clarity button. This will activate a pre-set combination of adjustments to directionality, speech enhancement, noise reduction along with some frequency shaping.

Fine-tuning using the 3-band equalizer

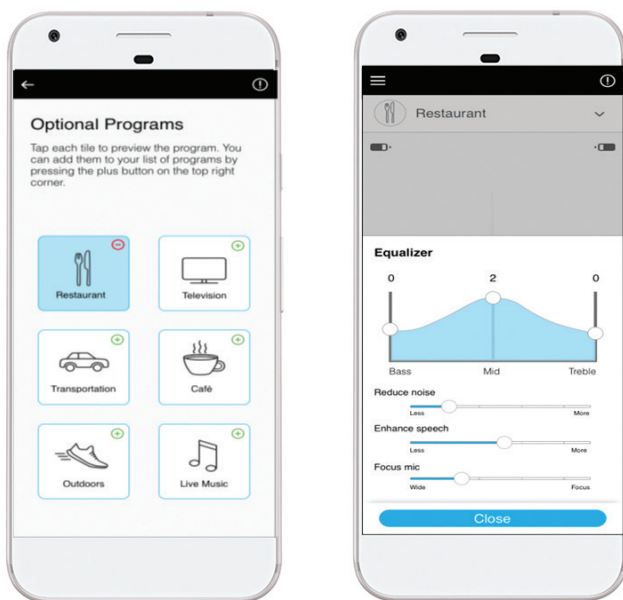

Equalizer allows patients to personalize their hearing instruments in the moment when it matters most. The 3-band equalizer allows patients to adjust the bass, mid and treble frequencies with their hearing instruments independently in their automatic program, streaming programs and manual programs.

Creating additional optional app programs

If a patient is in a listening situation where they want to make substantial changes outside of the automatic program, they can select from 6 pre-set manual programs available right in the app.

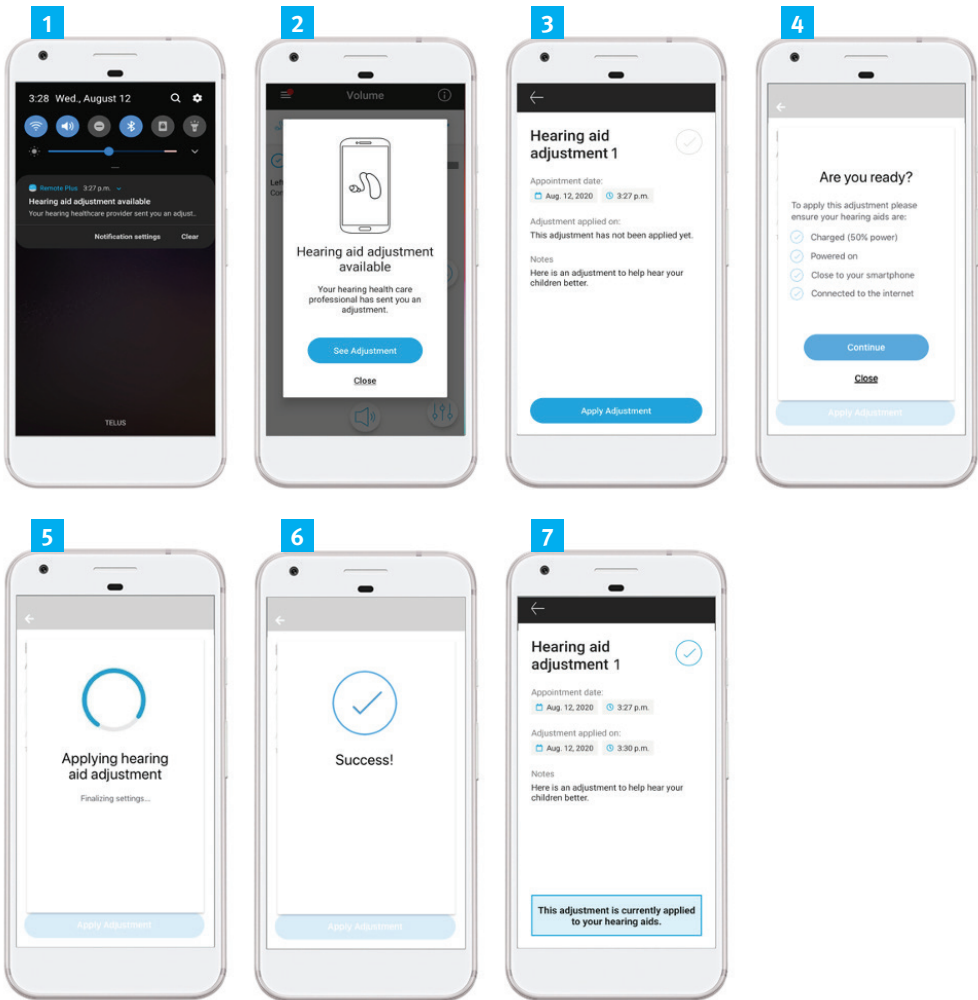

Within each of these optional manual programs your patient can adjust the 3 band equalizer, speech enhancement, noise reduction and focus the directional microphone.

Adjusting sound optimization
of additional manual programs

Remote adjust

Remote adjust allows you to move beyond the traditional way of supporting your patients and offer enhanced flexibility with the option to perform fine-tuning adjustments remotely. Fine-tuning adjustments are easy to make and sent directly to your patients via the Remote Plus app. Your patient receives a notification on their smartphone via the Remote Plus app and taps to apply the adjustment when it is convenient.

Coach

Our coach feature is designed to assist you in helping your patients reach their full potential with their new hearing aids.

- Analyze performance
- Usage, ratings, overall satisfaction
- Instruct in relevant skills
- Insertion/removal, charging/batteries, care & maintenance
- Provide encouragement
- Consistent usage, tips for hearing in noise

Ratings

Ratings is a tool in the Remote Plus app, where patients send an in-the-moment impression of their listening experience whether positive or negative. Ratings you patients have submitted can be viewed in Unitron TrueFit or myInsights. If a patient sends 3 negative ratings, a notification email will be sent to the provider. This function can be turned off through the myInsights website.

How to setup the PartnerMic

Charging the device

PartnerMic has a built-in, non-removable, rechargeable battery.

① When charging the PartnerMic for the first time, let it charge for at least 2 hours, even if the indicator light is not lit or turns green.

- Plug the power supply into a power socket
- Plug the USB plug into the PartnerMic charging input
- The typical charging time is 2 hours
- Charging is complete when the indicator light turns solid green

① PartnerMic will be turned off while charging.

Switching on/off

Slide the power switch to turn the PartnerMic on or off. Switch it off when not in use.

How to connect to the PartnerMic

Pairing the PartnerMic to the hearing aids

PartnerMic needs to be paired to the hearing aids before use. If the PartnerMic has not been paired to a hearing aid before it will automatically enter pairing mode at start up and blink blue.

- Make sure your hearing aid(s) are turned on
- Start the PartnerMic and hold it within 10 cm (4 inches) of the hearing aid
- Pairing is complete when the indicator light turns green and a confirmation beep will play in your hearing aid(s).

How to wear

PartnerMic is worn by the speaking partner, attached with the clip or hanging in a lanyard.

With a clip:

- Gently press to open the clip
- Ensure the PartnerMic is clipped securely to clothing

With a lanyard:

- Attach the PartnerMic to the lanyard with the clip
- Put the lanyard around the neck
- Adjust the length by pulling the loose ends

Positioning of the PartnerMic

- For optimal performance, place the PartnerMic 20 cm (8") below the wearer's mouth
- A distance of 50 cm (20") should not be exceeded
- Avoid tilting the PartnerMic beyond 45°
- If the clip cannot be fastened to clothing use the supplied lanyard
- To prevent scraping sounds, do not cover the PartnerMic with clothing during use

Adjusting the volume on the PartnerMic

The volume of the PartnerMic can be adjusted with the multi-function button on your hearing aid or from the Remote Control functions within the app, available for both Android and iOS.

How to adjust the balance between the PartnerMic and the surrounding environment

- Push the upper part of the hearing aid button to increase the PartnerMic streamed signal and decrease the volume of sounds in your environment
- Push the lower part of the hearing aid button to decrease the PartnerMic streamed signal and increase the volume of sounds in your environment

How to setup the Remote Control

Activating the Easy Line Remote Control

Pull out the battery protective tab to activate the Remote Control.

Switching on/off

Use the slider to switch on or off.

How to connect to the Remote Control

Pairing the Easy Line Remote Control with the hearing aids

To use the Remote Control with the hearing aids, you must first pair the hearing aids.

Set the hearing aids into pairing mode by switching them on. You now have 3 minutes to pair the Easy Line Remote Control with the hearing aids.

1. Press and hold the volume up “+” button
2. Switch on your Remote Control while still pressing the volume up “+” button
3. Release the volume up “+” button when the light indicator starts to blink blue
4. The Remote Control and your hearing aids will now pair automatically
5. After a successful pairing the light indicator is solid green for 5 seconds and you may hear a notification beep in your hearing aid
6. You can now use your Remote Control

Changing hearing aid volume

How to set up the TV Connector

Plug the micro USB into the back of the TV Connector

Plug the USB into the power plug

Connect the power supply to the electrical outlet

Plug the end of the audio cable (3.5mm analog jack or Digital Optical cable) into the audio output on the TV

How to connect the TV Connector

The first time the TV Connector is connected to a power source, connection to the hearing instrument(s) is **automatic**. Hearing instrument(s) must be within a range of **3 feet** of the TV Connector when pairing. Once it is paired with the TV Connector, the client will hear a confirmation melody in their hearing instrument(s).

Once the audio source is on, the audio signal will be transmitted directly to the hearing instruments via the TV Connector. A high quality audio signal is guaranteed within a **45 foot** range. The hearing instruments will **automatically** connect to the TV broadcast program once a signal is detected.

To connect new hearing instrument(s) to the TV Connector, press the connect button on the back of the TV Connector; the LED indicator light will blink blue.

Make sure the hearing instrument(s) are within a range of **3 feet** from the TV Connector.

Daily use of the TV Connector

Balance of the environment

While listening with Discover hearing instrument(s) and the TV Connector, the client has the ability to adjust the balance between sounds captured from the TV and the surrounding environment by the microphones of the hearing instruments.

How to adjust the balance between the TV Connector and the surrounding environment

Adjusting the volume balance between the television and the environment:

- Push the **upper** part of the hearing aid button to **increase** the TV volume and **decrease** the volume of sounds in your environment
- Push the **lower** part of the hearing aid button to **decrease** the TV volume and **increase** the volume of sounds in your environment

Get ready to
Love the experience

At Unitron, we empower people with life-enhancing hearing experiences that fit seamlessly into their world. Our sound performance technology, experience innovations, and intuitive design work perfectly together for unmatched personalization and optimization. Because everyone deserves to **Love the experience.**[™]
